Facts About Secondhand Smoke

- Secondhand smoke is the third leading cause of preventable death in the United States
- There is no "safe" level of exposure to secondhand smoke
- Secondhand smoke is the leading trigger of asthma attacks in children and adults
- Smoke-free laws help smokers quit and prevent children from starting to smoke
- Establish your car and home as smoke-free zones
- Smoking doesn't just affect the smoker. More than 4,000 chemicals are found in cigarettes, 69 of which are known to cause cancer. These chemicals are responsible for causing thousands of deaths each year in non-smokers.
- Help keep your community prosperous and workers healthy by supporting smoke-free restaurants and businesses

What can you do?

(What can you do as a consumer to support 100% smoke-free restaurants?)

Encourage restaurants you dine in to become smoke-free. Ask to speak to the owner or manager. If they use the excuse that it will contribute to loss in sales, inform them of the following facts:

- Studies and sales tax data indicate that smoke-free policies usually boost business.
- If you do lose a few smokers in the beginning, count on gaining non-smokers who will learn about your smoke-free policy.
- Over 158 restaurants in Champaign County are smoke-free. These numbers will continue to increase as restaurants owners realize the benefits of operating a smoke-free restaurant.
